Case Opener Tool XX1521

Step #1

Use the case opener tool to carefully extract the glasstop. **NOTE:** There is a cable attached to the screen that must be disconnected before complete removal.

Step #2

Disconnect the cable pictured connecting the glasstop to the motherboard.

Step #3

Remove the glasstop carefully using an exacto knife. Remove residual adhesive.

Step #4

Use a thin double sided adhesive to adhere the glasstop. Glasstop should be positioned carefully to sit flush inside the frame.

Step #5

Note the position of the connection for the new glasstop and reconnect to the motherboard.

Step #6

Complete the reassembly by snapping the glasstop frame and glasstop into the metal bezel case frame.
