INSTALLATION DIRECTIONS IPHONE 4 ORIGINAL GLASS BACK COVER IP-2418 & IP-2419

Sim Card
Ejection
Tool IP-2292

Mini
Philips
Driver XX2240

Case
Opener
Tool XX1521

Step #1

Use the simcard ejection tool as pictured to eject the simcard tray.

Step #2

Remove the 2 case screws using the mini screwdriver. This will allow the back case to be removed.

Step #3

The back case will slide up as shown. When you feel resistance, lift the back cover and set aside.

Step #4

Replace the back case with the replacement part. Separated sections are pictured here.

Step #5

Replace the back of the phone as pictured aligning tabs with the inside of the case. Case will snap into place by sliding down slightly once aligned.

Step #6

Replace the two case screws which hold the back of the case to the main case. Finally, replace the simcard and simcard tray.
